    ** NOTICE **

    This is not a walkthrough but a complete description of game mechanics,
compiled
by analyzing the entire game code. Use it to design your own strategies.

    Advancing through the scenarios is more rewarding than just hunting stats.
All paths
contain good quality stories, regardless of the outcome.

```
================================================================================
######################
##      Mechanics      ##
```

There are 4 skill categories: brutal, hypno, sex, incubus
The skill level = XP/2   (experience points /2)

* Actions available:
The prey scenarios (top) will advance the day.
The actions (bottom) will not (with a few quest exceptions). Instead they cost 1
stamina

stamina = 1 + (incubus_level + brutal_level) /2
    if god, stamina = 77

At low incubus levels prey scenarios are randomly not available. Save and reload
the game to reroll the random choice
Chance to see night adventure = random(10) < incubusXP + 8
    80% at 0 incubusXP, 100% at 2 incubusXP

Alignment (represented by a balance) = (approximately) love_Score - rape_Score
    They are a few GOOD endings which require a positive alignment to unlock and
a few EVIL.
    Most endings are neutral. Buying a 'wapal indulgence' removes the alignment
requirement

* Brutal/Hypno XP are only shown past a certain level (called burtal_informed /
hypno_informed in the code)
Your brutal / hypno level are not 0, just not displayed. Unlock 10 endings to
always display your levels.
    hypnosis   = love_score >= 3
    brutal   = rape_Score + 2*kill_Score >= 8

```
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
* The result of your choices

Your scenario choices are reduced to a combination of 6 basic actions: PREG FUCK
RAPE HYPNO KILL PIMP

Points awarded function of action
            KILL     RAPE     HYPNO    FUCK      PREG
brutalXP    2        1
hypnoXP                       1        1
sexXP                0.5               1
incubusXP                                       1

For some scenarios Goodsex (during FUCK) or Goodrape (during rape) are possible.
Goodrape transforms a RAPE into a FUCK action. Goodsex/Goodrape also unlock
different paths in the scenarios.

Chances of extra incubusXP with high incubus:
    random(6400)< incubusXP/4   = exponential impregnation +16 incubus
    random(6400)< ......        = ultimate impregnation +16 incubus
    random(1600)                = octuplets +8 incubus
    random(600)                 = quadruplets +4
    random(100)                 = twins +2

* Add/Use the new talent.
Additionally your choices determine if a girl is available:
    P = to be pimped to Waid
    H = to be added to your harem or
    V = to be recorded in a new porn video

Start OR harem     PREG     FUCK     RAPE     PIMP
God                PH       PH       H        P
Porn                        V        V        P
harem                       H                 P
brothel                              ?H?      PH
slave                                H        PH

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
** MAX requirements for the skills used

It is not necessary to grind the skills as lvl 17 (hypno, sex) or 10 (brutal,
incubus) pass most of the scenario requirements.
The only high skill requirements are listed below:

brutalXP.level:    56 (Shinoa brutal stream path) 10 (mass rape the sisters)
hypno.XP.level:    26 (mass hypno the sisters during evening) 16 (hypno
babysitter during makeout)
sexXP.level:       35 (goodrape your harem slaves) 24 (goodrape Waid's girls
pimped by raping) 17 (goodsex Dona's friends)
incubus.XP.level   67 (destroy brothel by ejaculating) 26 (find Shinona at the
market), 10 (find college girl at the party)

================================================================================
```

```
#########################
##    General hints     ##
```

1. Buy enky spice from Midnight fence.
Increases the breeding season length by +1 when bought
***NOTE ***: currently midnight fence is bugged and can be accessed directly
from the action list.
*** NOTE ***: Change your name to "Gate" to automatically meet fence. Warning:
the cheat menu is bugged, save beforehand.

Unlock midnight fence by grinding: go the the cinema / brothel / slavers
dungeon, then back home. Repeat until you meet him.
After you meet it him for the first time you can unlock the tokens: points
awarded by playing some specific scenario paths
Find 28 tokens (token rank 4) then search for midnight fence again.
The chance of meeting midnight fence increases with the number of tokens.
Meeting him repeatedly unlocks the "sell" and "buy" stores. 5th time will will
become permanently accessible through the action list.

2. Visit the comaGirl to unlock Waid, then pimp scenario girls and pass them to
Waid for money.
Money = enky spice = extra season days.
Having a slave stops you form meeting Waid. Get around it by:
- going to comaGirl then getting a harem from alleyGirl
- trading in your slave in alleyTrade
- storing the Waid 'business card' with Fence and retrieving it after the season
starts.

3. Unlock a harem by getting drugs from the copGirl then trading them in the
alleyGirl scenario.
Use your stamina to grind hypno and sex XP while keeping the brutal low (high
brutal can lock you out of some paths)
When you have enough hypno change your harem to slaves and grind them for brutal
and sex XP.
More brutal = more stamina = exponential increase of skills.
At sex=35 you can goodrape your slaves for brutal+hypno+sex HP for totally
ridiculous skill levels.

4. At 5 endings unlocked you can sleep until the end of the season and reach the
endings faster.
At 15 endings (and 7 current pregnancies) you can search for Princess Falia for
+2 extra season days.
Ar 24 endings (endings 25 is not counted) unlock God Emperor (almost infinite
money, season days and
stats). However you can only unlock new tokens in this mode (marriages and
endings are blocked)

5. You can quickly make 10000$ with: comaGirl > motelGirl > pimp to Waid/Tony >
request money
Buy what you need from the fence, then go to sleep and repeat. Most of the fence
items are persistent over seasons.

6 At token ranks 6,9,18 (rank=tokens/7) you can store items with fence. Best

choices to store:
business card - you cannot obtain it if you have a slave. Saves you one night since you do not visit coma Girl.
dreamochromes - sell them back for 4766$. Get multiples buy buying them, storing them and buying them again.
high tech gear - it is not persistent and it is expensive. Can be used and put back in storage
Less important: drugs, rings, gun

7. The fence items are bugged or can be considered cheating. Some excusable uses are:
crime machine - for restarting an online girl chat and re-rolling her stats.
oblivion parasite - to reset the number of rapes for the wedding bell endings in case you
        missed your target ending and don't want to completely waste the playthrough
wapal indulgence - ignore the alignment requirement on some endings

Melotine patch and pain amulet are direct cheating. They even block the beginning bonuses if in inventory at end season.
You can play a "beast unleashed" with 0 brutalXP this way.

8. Changing your pseudonym is a cheat menu: each of your name choice gives you different bonuses.
*** NOTE: it is bugged, save the game beforehand
I only recommend using:
    Librarian - to see the game gallery and complete hints tables.
    Gate - find midnight fence. No point grinding a 1% initial encounter rate.
    Endless - relock all your endings if you want to experience again the thrill of unlocking things.
    No Wives - relock all wives also
    No Tokens - really ?? at this point you can just start a new game.

==
##
Description of all possible prey scenarios paths

A chain of choices is represented by the indentation level.
@@@new_state   = marks a new state reaches.
FREE_RETURN_HOME   = the scenario ends without the day ending.
Another scenario can be played in the same day
[requirement or skill check]   = An [] signifies a requirement. If the requirements is not fulfilled the choice will not be available
!!AUTO   = An automatic choice (usually associated with high brutal) which prevents you from taking the other choices
path / parallel_path   = Two paths that rejoin and reach the same point.
rand(10)   = a random roll (RNG) performed during the scene

~~~~~ Example ~~~~~~~~
Path of Choices
